INDEPENDENT AUDITORS' REPORT

To the contractholders of Assumption Life Investment Funds

We have audited the financial statements of the Assumption Life Investment Funds listed in note 2 of the supplementary notes to the financial statements (hereafter named the «Funds»), which comprise the statement of financial position as at December 31, 2016, and the statements of comprehensive income, changes in net assets and cash flows of each of the Funds for the year then ended, and a schedule of investment portfolio as at December 31, 2016, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Assumption Life Investment Funds as at December 31, 2016, and the financial performance and the cash flows of each of the Funds for the year then ended in accordance with International Financial Reporting Standards.

1. Organization

Assumption Mutual Life Insurance Company

Assumption Mutual Life Insurance Company "Assumption Life" is the issuer of the variable deferred annuity policies in respect of which the Assumption Life Investment Funds, "the Funds", were created. Assumption Life is an insurance company incorporated as a mutual life insurance company on March 30, 1968, under a private law of the Province of New Brunswick's Legislative Assembly. Assumption Life is currently doing business in all Canadian provinces. Its head office is located at 770 Main Street, Moncton, New Brunswick, E1C 8L1.

2. Funds

In 2016, the following segregated fund was closed:

Assumption/AGF International Stock Class Fund

Each Fund is a segregated Fund established by Assumption Life. The Funds follow the guidelines on individual variable insurance contracts relating to segregated funds established by the Canadian Life and Health Insurance Association Inc. The Assumption Life Funds are managed by Assumption Life; the Louisbourg Funds are managed by Louisbourg Funds are managed by Fidelity Investments Canada Limited; the CI Funds are managed by CI Investments Inc. and the AGF Funds are managed by AGF Funds Inc.

The Assumption Life Funds invest in units of a number of underlying funds, while the Louisbourg Funds, Fidelity Funds, CI Funds and AGF Funds invest in units of only one underlying fund.

The following are the segregated funds established by Assumption Life:

Assumption Life Funds

Assumption/Louisbourg Balanced Fund Assumption Growth Portfolio Assumption Balanced Growth Portfolio Assumption Balanced Portfolio Assumption Conservative Portfolio

Fund Facts are available on the Company's Web site, www.assumption.ca. The Fund Facts give an idea of what each fund invests in, how it has performed, how risky it is and what fees may apply.

3 . Summary Of Significant Accounting Policies

The financial statements are established in accordance with International Financial Reporting Standards (IFRS) as published by the International Accounting Standards Board (IASB). The Funds adopted this basis of accounting as required by the Canadian securities legislation and the Canadian Accounting Standards Board.

The establishment of the financial statements in accordance with these principles requires estimates and assumptions made by management that affect the amounts of assets, liabilities, income and expenses presented in the financial statements and the supplementary notes. Actual results could differ from these estimates and assumptions.

The significant accounting standards followed by the Funds are as follows:

Financial Instruments

The Funds recognize financial instruments at fair value upon initial recognition. Regular purchases and sales of financial assets are recognized at their trade date. The Funds investments are measured at fair value and all change in fair value is recognized in the statement of comprehensive income. Investments in underlying funds are valued at the closing net asset value of the units owned as established by the manager of the underlying funds at the valuation date. All other financial assets and liabilities, including redeemable units to contractholders, are measured at amortized cost. Under this method, financial assets and liabilities reflect the amount required to be received or paid, discounted, when appropriate, at the contract's effective interest rate. The Funds accounting policies for measuring fair value of its investments are identical to those used in measuring its net asset value (NAV) for transactions with contractholders.

Investment transactions and income

Investment transactions are accounted for on the trade date, which is the date the order to buy or sell is executed.

Interest income is recorded on the accrual basis. Distributions from underlying funds are recorded when declared by the underlying funds.

Realized gains (losses) on sale of portfolio investments are calculated using the original cost of related investments. Unrealized gains (losses) on portfolio investments are calculated as the in-year change in the excess (deficiency) of fair value over original cost of portfolio investments held.

Notes to Audited Financial Statements

For the period ended December 31, 2016

3 . Summary Of Significant Accounting Policies (continued)

Classification, unit valuation and valuation date

The Funds units outstanding are classified as financial liabilities under IFRS, IAS 32, as the contractholders have the right to require the issuer to redeem them at their net asset value. Net asset value per unit is determined each day at the close of trading of the Toronto Stock Exchange and remains in effect until the next close of trading, at which time the determination of the net asset value per unit is made. The unit valuation for each Fund is made by dividing the total value of the Fund's net assets by the total number of units outstanding in the Fund.

4 . Financial Instrument Risks

Risk management

The Funds invest solely in units of underlying funds and are exposed to a variety of financial instrument risks: credit risk, liquidity risk and market risk (including interest rate risk, currency risk and other price risk). The level of risk to which each Fund is exposed depends on the investment objective and the type of investments held by the underlying fund.

The value of investments within an underlying fund portfolio can fluctuate daily as a result of changes in prevailing interest rates, economic conditions, market conditions and company-specific news related to investments held by the underlying fund. The underlying fund manager manages the potential effects of these financial risks on the Fund's performance by employing and overseeing professional and experienced portfolio advisors that regularly monitor the fund's positions, market events and diversify investment portfolios within the constraints of the investment guidelines.

The Funds do not manage their underlying funds and therefore the quantitative and qualitative risk disclosures have not been disclosed. For further information on the financial instrument risks of the underlying funds and the sensitivity to price changes, please refer to the financial statements of the underlying funds. You will also find risk disclosures in the Funds' Information folder on the Company's Web site, www.assumption.ca.

Credit risk

Credit risk is the risk that a security issuer or counterparty to a financial instrument will fail to meet its financial obligations. All fixed income securities are subject to credit risk. The carrying amount of debt instruments represents the credit risk exposure of each underlying Fund.

Liquidity risk

Liquidity risk is defined as the risk that a fund may not be able to settle or meet its obligations on time or at a reasonable price. The underlying funds are exposed to liquidity risk through daily cash redemptions of units. The majority of the underlying funds' investments are traded on an active market and can therefore be readily realized.

Interest rate risk

Interest rate risk arises when an underlying fund invests in interest-bearing financial instruments such as bonds. The underlying fund is exposed to the risk that the value of such financial instruments will fluctuate because of changes in the prevailing levels of market interest rates. In general, as interest rates rise, the price of a fixed rate bond falls, and vice versa.

Currency risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Funds' and the underlying funds' reporting currency, will fluctuate due to changes in exchange rates. However, the underlying funds are exposed to currency risk to the extent that their investments are denominated or traded in a foreign currency.

Other price risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk). The value of each investment is influenced by the outlook of the issuer and by general economic and political conditions, as well as industry and market trends. All securities present a risk of loss of capital.

5 . Capital Management

The Funds consider their net assets to be their respective capital. The capital of the Fund is managed in accordance with the Fund's investment objectives. The relevant capital movements are disclosed in the Statement of Changes in Net Assets of each Fund. The Funds have no restrictions or specific capital requirements.

6 . Fair Value Of Financial Instruments

The Funds are required to classify financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

Level 1: Quoted prices are available in active markets for identical investments as of the reporting date. Quoted prices for these investments are not adjusted, even in situations where a large position and a sale could reasonably impact the quoted price.

Level 2: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date.

Level 3: Pricing inputs are unobservable. The inputs into the determination of fair value require significant judgment or estimation.

The Funds invest only in other investment funds. For further information on the fair value hierarchy of the underlying funds, please refer to the financial statements of the underlying funds.

Notes to Audited Financial Statements

For the period ended December 31, 2016

7 . Other Administrative Expenses

Included in "Other Administrative Expenses" are all fees (except for the management fees payable by the Funds), and all other expenses incurred during the ordinary course of business in relation to the establishment, management, and operation of the Funds. They include, among others, legal fees, audit fees, safekeeping fees, administrative fees, bank charges, registration fees with regulators, the production and distribution of financial data, taxes and any other expenses incurred for the operation of the Funds.

8 . Management Fees

Management fees means the fees charged to administer the Funds. Management fees also include management fees of the underlying funds, so there is no duplication of management fees. Insurance fees, for the cost of the guarantee at maturity and guarantee upon death, are included in the management fees. Management fees, expressed as a percentage, are deducted daily from the assets of each Fund before calculating its unit value.

The management of the Assumption Life Funds is carried out under the overall authority of the board of directors of Assumption Life, which subcontracts the management of the Funds to Louisbourg Investments Inc., whose shares are owned by Assumption Life (70%) and 647439 NB Inc. (30%). The company 647439 NB Inc. is 100% owned by some managers of Louisbourg Investments Inc. Louisbourg Investments Inc. is responsible for the investment analysis, recommendations, decisions, and the purchase and sale of the securities in respect to the Funds.

The Louisbourg Funds, the Fidelity Funds, the CI Funds and the AGF Funds are managed, on a day-to-day basis, by Louisbourg Investments Inc., Fidelity Investments Canada Limited, CI Investments Inc. and AGF Funds Inc. As managers, they are responsible for the investment analysis, recommendations, decisions, and the purchase and sale of securities for the Funds.

9 . Increase (Decrease) In Net Assets Resulting From Operations Per Unit Of Each Series

The increase (decrease) in net assets resulting from operations per unit of each series is calculated by dividing the increase (decrease) in net assets resulting from operations by the weighted average number of units outstanding during the period.

10 . Income Taxes

The Funds are deemed to be inter-vivos trusts under the provisions of the Income Tax Act (Canada) and are deemed to have allocated their income to the contractholders. Each Fund's net capital gains (losses) are deemed to be those of the contractholders. Accordingly, the Funds are not subject to income tax on their net income, including net realized capital gains for the year.

11 . Comparative Figures

To conform to the presentation adopted in the current year, certain amounts from prior years have been reclassified.

12 . Investments Of Underlying Funds

The financial statements of the underlying funds are available upon request by contacting Assumption Life.

The following tables show selected key financial information about the Funds and are intended to help you understand the Funds financial performance for the past five years.

Financial Highlights Unaudited

For the period ended December 31, 2016

Endnotes To The Financial Highlights

- ¹ The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.
- 2 The Fund's portfolio tumover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio tumover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio tumover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high tumover rate and the performance of a fund.

WHY CHOOSE Assumption Life?

Assumption Life offers you solutions that are flexible, secure, and affordable, as well as:

- Sound advice
- Innovative products
- Diversified selection of investments
- Skilled, professional managers
- Competitive performance
- Reduced administration fees

Through our subsidiary Louisbourg Investments and by means of our strategic alliance with Fidelity Investments, AGF and CI Investments, we are equipped to help you build a prosperous future.

We have been meeting the needs of our clients successfully for over 100 years. We constantly strive to maintain and cultivate this special relationship by offering you quality financial products and services.
